

Take time 'to smell' the flowers,

not 'to pick' the flowers!

With spring comes the beauty of all the wonderful flowers and greenery that the Ulysses parks have to offer us! Isn't it a great feeling to sit and relax in the park under the shady, lustrous green trees while the kids are playing? Or even walk along the landscaping to smell and look at all the wonderful and colorful flowers that are growing for our small pleasures?

Unfortunately these small pleasures are being picked or removed from our parks! Many people are taking them home or picking them just for fun. Some may even think they are landscape artists themselves by rearranging plants or rocks. We kindly ask that no one pick the flowers, tear out plants or cut any of the vegetation in or around the parks. Please do your part in continuing to help keep our community's parks enjoyable for everyone. Please report any vandalizing or illegal activity in or around our parks to the Law Enforcement Center @ 620.356.3500. Your help is greatly appreciated!

You may talk with Sherrie if you would like tips on gardening or are curious about the vegetation growing in any of the parks. You may contact her through Bentwood Golf Course, or if you see her working around town, helping make another park or landscaped area more enjoyable for the community, just stop by and visit with her. She would be more than happy to personally help you out or answer any of your questions about the landscaping vegetation she maintains!

Thank you for helping make our community's parks more pleasurable to visit!
