Item 5: Discussion on ordinances for Historic District.

H. Kelley empty lots that do not meet the city's frontage ordinances. Is there a recommendation to modify the standards to allow those lots to be built. Suggestion that there is not to be a certain frontage but to allow them to build to preserve the nature of the district. J. Hicken what role is the variance committee. D. Astle, Variances are very difficult to come by.

H. Kelley, talk about materials like siding. J. Hicken made comments about the list left by B. Nelson. Discussion of the eight items. H. Kelley, garages should be not in the front but in the back, discouraged strongly. J. Hicken finally pass off will be done by the P & Z. D. Astle ordinances are objective not subjective of what will be the ordinance. P & Z will do exactly what the ordinance says it is.

K. K asking for things are sooner that later, this committee would make the suggestions, then Scarlet or P & Z would write up the ordinance and then it would be presented to final consideration. The committee should be very specific on the standards that should be met and how the standards to be set up. Question is that from Korral could be developed of what guidelines that could be a visioning document. Then the ordinances could be derived from.

J. Robinette a document that could be a welcome to the historic district and what the district is all about. D. Astle, like looking at this like a new subdivision, type of generalities that are required for the area to preserved the character of the district. J. Hicken, commented about the other documents from other cities, and what is desired.
