Easy Strip Quilt

One package of 2 ½” strips makes a lap size quilt! Or you can easily make your own by cutting the strips from your stash.

Make sure that the width of each piece is exactly the same. The 2 1/2” strips should be different lengths to create a random pattern and so the seams are not lined up. Just cut the first 2 ½” strip in half prior to sewing them together and then use the other half somewhere else in the long strip.

Begin sewing all the strips together to create one VERY long strip.

After all your 2 ½” strips are sewn together into one long strip, fold the long strip back onto itself and sew one side together. When you reach the end with the fold, stop sewing and cut apart on the fold and then finish your seam.

Repeat the above step until your top piece reaches the desired length. Trim any sides that may hang over the edge. You have now completed your first strip quilting top piece.

Add borders or just leave it as it is...Simple and Easy!
