

# Pillow Case Kit

1. Fold accent strip in half lengthwise wrong sides together and press.
2. Square up edges of pillow body and sleeve fabrics.
3. Stack the three fabrics lengthwise, right sides facing UP and raw edges of accent strip towards you in this order - sleeve fabric, body fabric, accent folded strip. Line up the 4 raw edges that are facing you. (Since the accent strip is folded in half, there are 4 raw edges)
4. Fan or fold the pillow body fabric up towards the aligned raw edges but at least 1 inch away from the edges until the pillow body fabric is less than one half of the sleeve fabric.
5. Take the now exposed raw edge (the one away from you) of the sleeve fabric and bring it together toward you encasing the other fabrics. Line up this raw edge with the 4 others and pin.
6. Sew a  $\frac{1}{2}$  inch seam the length of the fabrics forming a tube.
7. Grasp the inside fabrics at one end and pull them out from the tube. Both sides of the sleeve fabric should be cleanly finished.
8. Open and press.
9. Fold in half **WRONG** sides together. Trim edges straight if necessary and sew a  $\frac{1}{2}$  inch seam down the two raw edges. Snip away corner to avoid bulk.
10. Turn pillowcase inside out and sew another seam to encase the raw edges. Press flat to finish.

pillow body 26" x 41"  
sleeve 10" x 41"  
accent 3" x 41"
