

Royal Everlast Series

Each Royal Everlast Upright comes with a 14” bell-shaped nozzle and a curved, double-row ball bearing revolving brush with stiffener to pick up deep down dirt other vacuums leave behind. The bell-shaped nozzle also provides effective dual edge cleaning along baseboards and edges of furniture, making your job twice as easy. Plus, for easy maneuverability and control, each Everlast upright comes equipped with our patented self-propelling “Cushionaire”™ feature and wide wheel design. The on/off switch is conveniently located in the handle. And, to help protect your upright from any damage to the fan or motor, the unique, curved metal fan blades were designed to deflect large foreign objects.
