

SEBO AUTOMATIC X

DESIGNED FOR CARPETS AND HARD FLOORS – The AUTOMATIC X is the most technically advanced vacuum cleaner in the world! It features an electronic controller that acts as a brain, measuring the resistance of the brush roller against the floor and signaling the power head to adjust up or down to the appropriate brush height, to ensure optimum performance on both carpet and hard-floor surfaces. The controller also regulates a warning system that not only alerts the user to problems such as clogs, a worn brush, a full bag and brush roller obstructions, but it also automatically shuts off the vacuum, when necessary, to protect the motor and belts from damage. In addition, the AUTOMATIC X has a convenient instant-use cleaning wand and suction hose, a lifetime belt warranty, and comes in two power head widths . . . the 12-inch X4 and the 15-inch X5.

STANDARD FEATURES

- Designed and Manufactured in Germany
- Excellent for Users With Allergies or Asthma
- Tightly Sealed Vacuums Ensure Effective Filtration
- Save Money! SEBO Vacuums Last for Years and Extend Carpet Life!
- Five-year Warranty Coverage
- Microfilters Ensure Strong Suction
- Changing Bags is Easy and Clean
- Effective Pet Hair Removal

Innovative Features

Instant-use Wand and Suction Hose – The integrated instant-use wand and suction hose are always ready. Just pull out either tool, or both together, to clean hard-to-reach corners, edges and crevices. The wand and hose together have an eight-foot reach. The suction hose is ideal for cleaning furniture. And an optional nine-foot extension hose is available, which creates a total hose length of 15 feet . . . perfect for cleaning stairs. Choose from a range of optional attachments that can be fitted to the wand or hose!

A Low 5 ½-inch Profile – Lower the handle flat to the floor to clean under beds, or lower it to the intermediate stop position to maneuver over rugs. Depress the foot pedal again to bypass the intermediate stop position, or close this position by moving the orange handle-position slider.

Automatic Height Adjustment: From Hard Floors to Carpets – The electronic controller adjusts the power head up or down to the appropriate brush height, providing optimal cleaning of both carpets and hard floors. The "sealing strip," located behind the brush, improves hard floor cleaning performance by channeling the airflow and preventing debris kickback.

Brush Adjustment Indicator Lights – Two green lights, one for "up" and one for "down," illuminate to indicate when the power head is in the process of adjusting brush height to the proper cleaning level. Optimal cleaning effectiveness occurs when both lights are off.

Brush Obstruction Light with Automatic Shut Off – If an obstruction jams the brush roller, the red "check brush" warning light flashes quickly, the brush roller immediately stops spinning, and the vacuum shuts off. This feature prevents the belts from breaking and protects the motor and carpet from damage.

Worn Brush Light. Easy Brush Removal and Cleaning – When the brush roller's bristles are worn to a point that brush agitation is less effective, the red "check brush" warning light remains illuminated during use. (The vacuum continues to operate; it will not automatically shut off.) When needed, installing a new brush roller or cleaning hair or other debris from a used brush is quick and easy, and no tools are required!

Stationary Use Light – When the vacuum is stationary in its upright handle-locked position, the power head adjusts upward to the height necessary (or to its highest possible level) to disengage the spinning brush roller from the floor. However, if the brush remains in contact with carpet fibers, despite the power head's upward adjustment, the red "check brush" warning light flashes to alert the user to avoid potential carpet marking from excessive use time in a stationary position. Usually, very high-pile carpets cause this situation, or the vacuum is tilted toward the brush roller while using the cleaning wand and/or hose. The solution is to tilt the locked upright handle backward such that the brush is raised above the carpet pile.

Bag Full or Clog Light with Automatic Shut Off – When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, the red "bag full or clog" warning light

illuminates, the vacuum automatically shuts off after 30 seconds, and then the warning light starts continuously flashing. This feature prevents overheating and motor damage from a lack of adequate airflow.

Combination Carrying Handle with Rotating Cord Hook – The AUTOMATIC X is easy to carry or quickly unwind the cord, using its unique handle with integrated rotating cord hook.

Three On-board Full-size Tools. Large Filter Bag – The vacuum comes standard with a crevice tool, dusting brush, upholstery nozzle, and a large 1.4-gallon filter bag. Also, many optional accessories are available.

Forty-foot Cord – A 40-foot cord saves time, by reducing the number of electrical outlet changes needed during use.

Lifetime Belt Warranty – Stop changing vacuum belts! With an AUTOMATIC X, they should last the life of the machine!

Two Power Head Widths. One or Two-sided Edge Cleaning – The AUTOMATIC X4 is 12-inches wide with a cleaning path of 10½ inches and one-sided edge cleaning. The AUTOMATIC X5 is 15-inches wide with a cleaning path of 14½ inches and two-sided edge cleaning.

Easy Maintenance – The clog removal door, brush, and replaceable hard floor "sealing strip" are easy to access.
