Quilt Sampler News

You might think that summer is slow, but we are busy here at the Quilt Sampler!! We have lots of fun classes to get you out of the summer heat. How about a fun mystery quilt to entertain you? Or make a masterpiece by using a technique called paperpiecing. If clothing is your thing we have some new clothing classes! We also have some cool groups/classes that are new and going to start in this newsletter. Check out our Schnibbles club and Stitchers Garden. You won't want to miss either one of those!

If you are not following us on Facebook you are missing out on seeing new products as they come in, awesome show and tell from our customers and any specials that we have. It's simple, just like us on Facebook and you will start getting our postings!

Finally, it is with a sad heart to tell you that Jamie has retired. Jamie has been a mainstay at the Quilt Sampler almost since we opened 18 years ago. Jamie has always decorated and rearranged the store and helped so many people figure their quilts and pick out fabrics. We will miss her, and our thoughts and prayers go to her and her family as she is battling cancer.

Open Sew on Tuesdays!

Let's Get Technical!

I want metal gears in my sewing machine! This is a statement I hear on a regular basis. Sewing machine manufacturing has come a long way in the past century and has made incredible strides in the past 20 years! The plastics of the 60's and 70's were of poor quality, the plastics and composites of today are fantastic! They have the durability of steel but not the down side of steel. As lubricants evaporate and wear away they can leave a varnish or gumminess on steel, plastics don't have that problem. Plastics also require little to no lubrication. The main hook gear in the Bernina 830 is not a steel gear – it is far better! Bernina spent more money putting in this "plastic" gear than if they had installed a steel gear. Pfaff has used a plastic/nylon gear in their machines for years and I have never seen one fail.

Next newsletter I will talk about why plastic covers are a good thing on today's sewing machines. If you have any questions about the plastics vs the steel contact me at info@quiltsampler.com or come in and talk with me or Nate.
