

Todd Miller, MD

I currently work as a Family Physician in the Bear River Clinic. I serve as the Medical Staff President and Medical Director of Bear River Valley Hospital. I also volunteer as the Trustee for Box Elder County for the Utah Medical Association. The most rewarding part of my job is delivering babies and seeing children grow and develop.

I got my Bachelor Degree at USU and went to Medical School at the University of Utah. I completed specialty training in Provo.

With my wife, Kayla—also an Aggie, we have 4 active, school-aged children. They are very involved in youth recreation, dance, 4-H, etc. We enjoy living in Garland because of the friendly, rural atmosphere, clean air and safe community where we can all get involved.

My interests include camping; gardening and watching my kids participate in sports. I have been involved in coaching youth sports and look forward to working towards developing a Garland City youth recreation program. I currently work with the 11 year old Boy Scouts in our troop.

I am honored to be nominated to run for City Council. I am interested in working to advance business/civic relationships for the community, city beautification and more involvement of our best natural resource, our people.
