As the 2011 Fall Leaf Pick Up season approaches Brigham City Streets Division would like to share some general information regarding leaf pickup:

- It is the goal of the Street Division to remove leaf piles once per week in your area. However, schedules may change due to weather or work load
- Residents should not rake their leaves into the gutter but should keep them in piles on the park strip. Doing so will prevent clogging of the storm drain system.
- Remember, only leaves should be piled in the park strip. No other greenwaste or debris will be picked up.
- We want to help our residents clear the leaves. If you have a large amount of leaves to be picked up on the park strip and crews are not scheduled in your area on that day please contact us at 435-734-6615.
