

RED MEDIC

Red Dye Stain Remover

Red Medic is a special formulation of reducing agents designed to remove Kool-Aid® and fruit drink stains from carpet fabrics. Excellent for the removal of stains caused by strongly-colored natural disperse dyes, such as those found in food and beverages.

- **Broad Spectrum Stain Remover** - Surpasses the effectiveness of conventional spotters removing such tenacious stains as Kool-Aid®, grape juice, egg shell dyes, food dyes, wines, ink, and even iodine. Also effective on stains caused by the transfer of fugitive dyes common with upholstered fabrics.
- **Easy-To-Use** - Simply apply a generous amount of the solution to the stain. Apply a white terry cloth towel dampened with water and steam with a non-Teflon iron. Hold iron 2 to 3 inches off towel while steaming.
- **Soap Free Formula** - Leaves no shampoo residue to attract soil, preventing further staining problems.
- **Quick Action** - Removes stains by the heat transfer method. Steam energizes the special solvents and emulsifiers in Red Medic allowing it to penetrate, lubricate and unlock the stain from the carpet or fabric fiber.
- **Safe** - Safe for use on all colorfast carpet and most upholstery fibers without fear of discoloring or damaging. (Note: Before using on any carpet or upholstery fiber, always test in an inconspicuous spot for color fastness).
- **Convenient Packaging** - Available in cases of 12 quarts and 4 gallons.

Technical Data

Appearance	Clear, colorless, water-thin liquid
Fragrance	None
pH Concentrate	10.0 +/- 0.50
pH (1% dilution)	8.0 +/- 9.0
Solubility	Completely soluble in water
Specific Gravity	1.00
Flammability	None
Biodegradability	Complete
Viscosity	<10 Centistokes
Freeze Thaw Stability	Protect from freezing
Shelf Life	Guaranteed one year
