

Machine Embroidery Backpack Tag Tutorial Big Bee Applique and Embroidery Designs

Supplies:

Vinyl, cork or glitter sheet
Tearaway Stabilizer
Painters tape or regular clear tape
Adhesive spray
Embroidery Thread
Snaps and tool to attach them

Step 1 - Placement Stitch

Hoop tear away stabilizer and place in embroidery machine. Your first stitch color will be directly on the stabilizer. This is the placement stitch.

Step 2 - Tack Down Stitch

Place a piece of vinyl over the placement stitch. I found it worked better to use an adhesive spray to hold vinyl in place while stitching.

Stitch the design.

Step 3 - Float back

Remove hoop from machine and float another piece of vinyl on the back side covering the design. Use adhesive spray and tape edges down.

Step 4 - Finish

Place the hoop back in the machine and stitch the final step. When finished remove the extra tear away stabilizer and trim around the edge of the outermost stitch. Add snaps and your project is complete.
