

I Spy Simplicity

51.5"x65.5"

This quilt is made up of one 10" block and it looks like this:

Fabric needed:

- Half of the 10" I spy pack – 20 squares
- Gray – 2.5 yards

Cut 80 3" squares from the gray and snowball your blocks by drawing a diagonal line on your 3" gray squares. Place one in each corner of the larger square, right sides together, and sew across the square diagonally on the line. After sewing trim your seam allowance to $\frac{1}{4}$ ", then flip back the gray piece pressing on all four corners. Finished size of block before sewing into the quilt is still 10" square.

Here are some diagrams. SEW on the dotted lines and TRIM on the solid ones.

Sew your blocks together, inserting a 3"x10" piece of sashing between the blocks in the rows, using a layout of 4 blocks wide and making 5 rows.

Once your rows are sewn together, sew all rows together, inserting a strip of sashing that is cut 3" x 46" long (piece to get the needed length). Once all the rows are put together, add the outer borders. Use the diagram below to find measurements and cut. Sew the sides on first and then the top and bottom borders:

For the twin size, use the whole 10" pack, choosing your favorite 35 squares and follow the directions for making the snowballs.

Increase gray yardage to 3.5 yards.

Cut sashing strips at 2.5" x 10" for between the blocks and 2.5" x 56" for between the rows. Follow this layout:

To make a twin size quilt:
61.5" x 86.5"

For side borders, cut strips 3.5" x 79", piecing as necessary. Attach to sides.

For top and bottom borders

Cut strips 4.5" x 62", piecing as necessary to get the length needed. Attach to top and bottom.
