TWISTED FOURSOME QUILT!

The Twisted Foursome is an awesome quilt! With only one fabric, you can make many blocks that all look different. These are just some examples of how cool this quilt really is!

The main fabric for this quilt is, of course, the one that features the orange and red flowers. It's unbelievable that each block looks so different! At first glance, it seems as though it took a considerable amount of time to piece all of the blocks. In reality, though, it was just a matter of cutting the main fabric into small squares and arranging them into kaleidoscope blocks. :)

This may not look like it's the same quilt, but we promise it is! The main blocks are just turned sideways and have a pretty background around them. If you're a more advanced quilter, you can definitely do this with your own Twisted Foursome quilt!

The repeat on this fabric for this Twisted Foursome quilt is a little more spread out, and the kaleidoscope effect for each block is a little more subtle. It's beautiful, nonetheless! This goes to show that the fabric that you choose is the most important thing about the Twisted Foursome quilt.
