City Engineer report was given by Dan Mummert in Karla Greaser's absence. Trihydro has responded to the comments received from WDEQ on The Sundance West Water Tank project. When the final comments are resolved this project can be put out for bid.

Mr. Mummert reported on the work order for the Sundance Kid Tank Project. Trihydro is preparing a work order for engineering services for the Sundance Kid Water Tank Project. The project will include a 180,000 gallon tank and upgraded water transmission line. The project will require boring the new water lines under both the Frontage Road and the Interstate. One line is to supply water for the new tank. The other will be to upgrade the existing 6 inch main to a 10 inch water main.

In the Level I and Level II water studies the need to upsize water main lines was documented. A recent repair to the 3rd Street water line confirms the need to upgrade the water supply lines that are tied to the two older storage tanks. The areas affected are the North Zone, which is the downtown area and the South Zone, which is the area south of Sundance Creek and extends between HWY 14 & 585. The City has received grant funding from Abandoned Mine Land (AML) for the tank upgrades but funding to upgrade the water supply lines was not included at the time of the grant application.
