

How to properly uninstall Version 6?

Uninstall or change a program

To uninstall a program, select it from the list and then click Uninstall, Change, or Repair.

- 1. [lobit Uninstaller Download link](#)
- 2. First thing is you're going to open the lobit Uninstaller program you have downloaded.
- 3. The once the lobit program is open make sure "Batch" tick box is checked at the top of the program.
- 4. Now find anything Bernina related on your computer
 - Bernina Embroidery Software
 - Bernina Universal Communication Server
 - EConPC
 - Corel Draw (If you have version 6 ONLY) there is 3 of them you need to check.
- 5. Now the program will run each uninstall as many times as you checked programs to uninstall. Make sure Advanced is checked at the time once you start uninstalling. You can do this while it's working.
- 6. When all programs are uninstalled, you're going to hit "Power Scan" at the bottom of the program. Then do a select all delete.
- 7. Reboot your computer
- 8. Then download [Dongle driver download](#)
- 9. Unzip the downloaded file, and run it with your dongle connected.
- 10. Once that is complete, then you may reinstall your software.
