

## USB HOLDER

If using Mega hoop: Outer piece of fabric that measures 9" X 19" if hooping. Can baste or stick to stabilizer in the hoop – then need a piece that is 8" X 10". Either way, the fabric should be backed with Shape Flex or fusible fleece

Lining and inner pocket fabrics -- a fat quarter will make the entire holder

Cut this into the following pieces:

2 – 6" X 7" Pockets (interfaced, optional)

9" X 7" lining (interfaced, optional)

Tab 1 ¾" X 7" or piece of elastic or hair tie

Spacer 2" X 7"

Stable stick stabilizer or tear away stabilizer with 505 –choices if not hooping

If hooping fabric, then Ultra Clean N' Tear is good

Embroidery thread of your choice

Scissors for trimming fabric

Plan your design -- do you want name, design, combination? Design should measure no more than 80mm high and about 120mm wide

- If want to sew the entire holder in the hoop, then need to use either the mega hoop or the jumbo hoop; oval hooping requires that you will be sewing the outside with the sewing machine, not with embroidery.
