Please Sign-up (Free)

We will be providing kits to make this possible.

Join us as we stitch with purpose and make a difference in our community! This year, Bernina Gives Back is creating adorable toothpaste and toothbrush pouches for children in foster care. These simple handmade gifts provide a special place for personal items and remind these children that they are seen, valued, and loved.

We invite you to come sew, help assemble pouches, visit with friends, and be part of something truly meaningful. Whether you're an experienced stitcher or just willing to lend a hand, we'd love your help as we work together to create and donate as many pouches as possible.

Let's share our talents, our hearts, and a little kindness... one pouch at a time.

AURIFIL 28wt THREAD

Aurifil 28wt thread (wound on a signature gray spool) is a 2-ply, 100% long-staple Egyptian cotton thread. It is thicker and stronger than their standard 50wt thread, making it the ideal choice when you want your stitches to add bold texture, definition, and a rich visual impact to your projects.

It is incredibly versatile and commonly used for the following:

- **Machine & Longarm Quilting:** Excellent for free-motion quilting and thick, decorative topstitching. The thickness ensures the thread stands out on your quilt top.
- **Hand & Machine Appliqué:** Perfect for hand blanket-stitching, raw-edge machine appliqué, or decorative edging where you want clear, defined outlines.
- **Embroidery & Lace Making:** Widely used for machine embroidery designs that need to pop and provide 3D texture, as well as for bobbin work and machine lace.
- **Hand Work:** Highly favored by artisans for hand piecing (due to its high breaking strength), hand quilting, and for use as a double strand in cross-stitch.

Pro-Tips for Using 28wt Thread:

- **Needles:** Use a slightly larger needle to accommodate the thicker thread, such as a Topstitch, Denim, or Microtex needle in sizes 90/14 or 100/16.
- **Bobbins:** For machine sewing, pair it with a lighter thread (like 50wt Aurifil) in the bobbin and slightly loosen your top tension so the 28wt thread pulls perfectly to the top.]
- **Speed & Stitch Length:** Lengthen your stitch slightly to show off the gorgeous thread and lower your machine's top speed to stitch smoothly.

ROD TIDBIT

FREQUENTLY ASKED QUESTIONS

The upper thread indicator reacts even when the upper thread is not broken

- Check if there are any pieces of loose thread in the path of the upper thread and remove them.

The fabric puckers when I sew wide decorative stitches

- Place tear-away stabilizer underneath the fabric to stabilize it and carefully remove it once you have sewn the stitches.

The machine makes a buzzing noise.

- The bobbin winder is activated.

What embroidery formats can be used?

- Formats of various brands can be used: EXP, DST, PES, PEC, JEF, PCS, SEW, XXX

What's the use of the vertical spool pin?

- Necessary when using a second thread for example sewing with the twin needle. For stacked (parallel wound) threads, use the vertical spool pin to allow the thread to evenly feed off the spool.

Important: use the foam pad as base.

The lower thread indicator is not responding

There may be several reasons for this:

- The door of the hook cover is open. Close it.
- The sensor of the lower thread indicator is dirty and needs cleaning.
- The lower thread indicator has been deactivated in "Setup". Select "Setup", "Monitoring functions" and "Activating the lower thread indicator".

SewClean Portable Vacuum & Power Bank

The SewClean Portable Vacuum and Power Bank is the perfect clean-up companion for sewing rooms, craft spaces, retreats, and makers on the go. Designed specifically with creatives in mind, this cordless tool makes it easy to keep machines and workspaces clean, tidy, and ready for your next project.

Powerfully yet compact, SewClean delivers unmatched suction to remove lint, threads, fabric scraps, and dust from sewing machines, sergers, cutting tables, ironing mats, and more. It includes six interchangeable attachments, allowing you to move effortlessly from detailed machine maintenance to everyday workspace cleanup. Use the precision nozzle for tight machine areas, the soft brush for delicate surfaces, or the wide nozzle for quick table and mat cleanups.

A large capacity dust cup holds more debris, meaning fewer interruptions to empty it while you work. In addition to vacuuming, SewClean features a built-in blower function, offering controlled airflow to help clear debris from hard-to-reach areas, an ideal alternative to canned air and a practical option for regular machine care. Lightweight and cordless, SewClean is easy to take along to classes, sewing retreats, and events.

Its detachable rechargeable battery doesn't just power the vacuum and blower. It transforms SewClean into a portable power bank, letting you charge phones and small devices via USB-C wherever creativity takes you. This tool keeps your essential devices powered without adding extra cords or chargers to your bag. Smart, versatile, and thoughtfully designed for makers, the SewClean Portable Vacuum and Power Bank helps you maintain a clean workspace so you can focus on what matters most, creating.
