(Exhibit A)

BRIGHAM CITY CORPORATION

ELECTRIC SERVICE

SCHEDULE NO. 3

NET METERING SERVICE

AVAILABILITY: At any point on the City's interconnected system where there are facilities of adequate capacity.

APPLICATION: On a first-come, first-served basis to any customer that owns or leases a customer-operated renewable generating facility with a capacity of not more than ten (10) kilowatts for a residential facility and five hundred (500) kilowatts for a non-residential facility that is located on, or adjacent to, the customers' premises, is interconnected and operates in parallel with the City's existing distribution facilities, is intended primarily to offset part or all of the customer's own electrical requirements, is controlled by an inverter or switchgear capable of enabling safe and efficient synchronous coupling with Brigham City Public Power's electrical system, and has executed an Interconnection Agreement for Net Metering Service with the City.

DEFINITIONS:

Net Metering means measuring the difference between the electricity supplied by the Company and the electricity generated by an eligible customer-generator and fed back to the electric grid over the applicable billing period.

Inverter means a device that converts direct current power into alternating current power that is compatible with power generated by the Company.

Annualized Billing Period means the period commencing after the regularly scheduled meter reading for the month of June or in the case of new Schedule 3 service the date that the customer first takes service from Schedule 3 and ending on the regularly scheduled meter reading for the month of June.

Residential Facility means any customer that receives electric service under Brigham City Corporation Electric Service Schedule 1, and has a qualifying generating facility of 10 kilowatts or smaller

Non-Residential Facility means any customer that receives electric service under Brigham City Corporation Electric Service Schedules 6, 8, or 9, and has a qualifying generating facility of 500 kilowatts or smaller.

Renewable Generating Facility means a facility that uses energy derived from one of the following: Solar, Hydro, Wind, or any other renewable Energy approved by Brigham City Corporation.

Solar Contract Rate means the pricing available to Brigham City of a least cost current Solar Contract. (Generally a 20 year contract product.)

MONTHLY BILL NET METERING CUSTOMER: The monthly bill will be based on the customer's applicable rate schedule. Customers will be billed for energy consumed from Brigham City's electric distribution system, plus all other applicable fees and a credit for each kilowatt generated in excess of consumption will be applied to the customer's bill at the ***Solar Contract Rate***, on a monthly basis. If, through the course of the annual billing period as defined above, the customer generates more electrical energy than it receives from the City's electrical distribution system, the remaining credits not used for the customer's consumption will be paid to the customer at the ***Solar Contract Rate*** to Brigham City.

Monthly Bill:

Solar Contract Rate:

Beginning in May 2022: $31.25 per MWh or $0.0313 per kwh. This rate will be reviewed and adjusted annually with available Solar Contract Rates to Brigham City.
