

We need to keep Brigham City GREAT. Over the last 8 years on the City Council, working with wonderful Council Members, City Staff, Mayor and exemplary citizens, we have really positioned our City to be a landmark of leadership, forward thinking, planning and innovating. Here are a couple of things we have accomplished off the top of my head:

1. Protected current and secured new/future precious water resources
2. Invested in future power sources that will help stabilize costs
3. Improved City employee and citizen moral
4. Rebounded from a recession and "pandemic" with a strong business community and local job market
5. Fought hard and moving forward to address the accessibility to our city by "Bridging" the problem

These are just a few of the easy ones.....there are many more! I intend to continue this legacy and move the needle even further in favor of our beautiful community.... BRIGHAM CITY and it's citizens!
