The City Sewer System

Sometimes we forget the toilet is not a trash can. All wipes and disposable cleaning products belong in the trash, not the toilet.

Did you know flushing wipes down the toilet can cause problems in your home and in the City's sewer system? They may be labeled flushable, but they can clog the sewer system, contributing to costly cleanups and may result in basement backups.

COMMON OFFENDERS:

- Paper Towels
- Cleaning Wipes
- Baby Wipes
- Facial Wipes
- Feminine Hygiene Products

Many cleaning products are labeled "flushable" or "disposable" but they often don't dissolve or breakdown after being flushed. A general guideline is, if it doesn't dissolve as fast as toilet paper, it's not flushable.

We are asking everyone to please do their part and place these materials where they belong; in the trash.

KEEP THE WIPES

OUT OF THE PIPES!
