

RESIDENTIAL SERVICE

AVAILABILITY: At any point on the City's interconnected system where there are facilities of adequate capacity.

Application: This schedule is for alternating current service supplied at approximately 120 or 240 volts through on kilowatt hour meter at a single point of delivery for all electric service required on the premises for residential purposes.

When conditions are such that service is supplied through one meter to more than one dwelling or apartment unit, the charge for such service will be computed by multiplying the number of kwh in each block and the minimum charges by the maximum number of dwelling or apartment units that may be served.

When a portion of a dwelling is used regularly for business, professional or other gainful purposes, and 50 percent or more of the electrical energy supplied to that dwelling is being used for residential purposes, the premises shall be subject to residential rates. If 50 percent or more of the electrical energy supplied to the premises is used for other than residential purposes, the premises shall be classified as non-residential and electric service shall be provided under the appropriate non-residential schedule.
