

I have lived in Brigham City all my adult life. I've been in business for over 20 years providing IT and Telecom systems and support for local business and municipalities in Cache Valley. I am a fulltime stay at home dad with a 10 year old son working remotely. Being a dad, teaching/mentoring my son, coworkers and business partners is my greatest joy.

For the sake of our children and their prosperity, we [the people] must all get involved in governing our great country by starting at home, with ourselves and our community government. We can transform our communities and our government through conscious change in our behavior and environment.

As mayor of Brigham, I will provide an effective path to change for a more Constitutional form of government, Of the People, By the People, For the People. I will implement ways of getting "We the People" back into local government through both high-tech and low-tech solutions. As mayor I will push for community preparedness and readiness for the challenges that lie ahead from the fallout of the drought, the disastrous southern border and the continuing threat of cyber terrorism, all of which will have a profound effect on our community.
