FIND YOUR RING SIZE

METHOD 1: CREATE YOUR OWN

You'll need:
- String, yarn, or a thin strip of paper
- Pen or marker
- Ruler

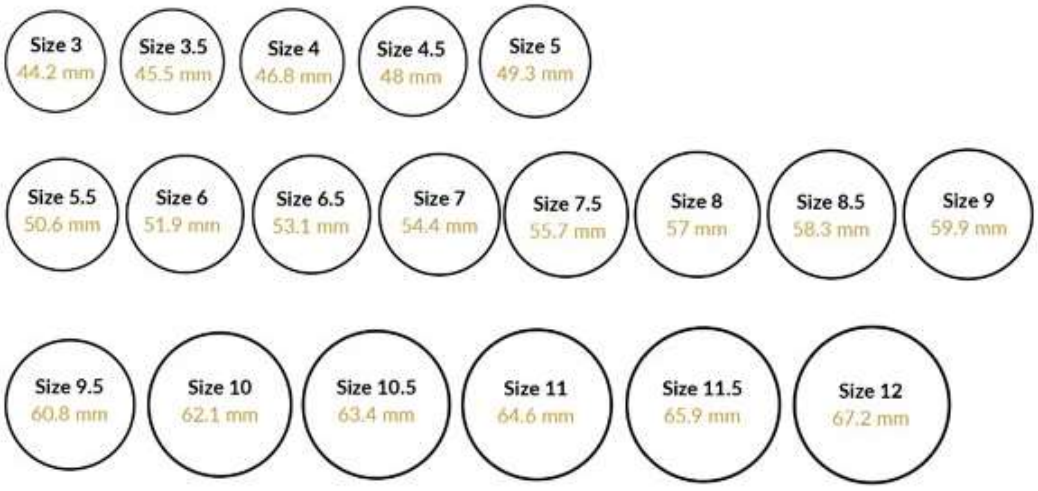
1. Cut a piece of string to at least 3 inches long
2. Wrap it around the base of the finger you plan to wear your ring on. Make sure to it's snug!
3. Using a pen or marker, mark where the ends overlap
4. Lay the string flat and use a ruler to measure the length in millimeters
5. Use the Ring Size Conversion Chart below to find your corresponding ring size.

METHOD 2: 2PRINT YOUR SIZER

1. Cut out the ring sizer below
2. Wrap the ring sizer snuggly around the widest part of the intended finger so that the numbers are visible to you and insert the pointed end through the slit you made in the sizer.
3. Make note of the number that lines up with the slit, this is your ring size! Keep in mind that quarter sizes are also available if your sizer indicates that you are between whole and half sizes.

METHOD 3: MEASURE A CURRENT RING

1. Choose a ring that correctly fits the finger you are purchasing the ring for. In the United States the engagement ring and wedding band are most commonly worn on the ring finger of the left hand.
2. Lay the ring over each of the size circles below until you are able to closesly match the inside edge of the ring to one of the circles on the guide.
3. If the ring falls between two of the sizes, order the quarter size in the middle.

RING SIZE CONVERSION CHART


Measurements are equivalent to the interior circumference of the corresponding ring size.
