

# Husqvarna Viking Machine Updates

Connect to the internet.

Go to [www.husqvarnaviking.com](http://www.husqvarnaviking.com)

USA

Scroll to bottom of home screen

Click on machine updates

Choose machine to be updated. If your machine is not listed go to archived machines. It should be listed there.

Under updates and downloads click on Learn More

On the right side of the screen you will find instructions to use USB cable and USB Embroidery stick. Husqvarna recommends using the cable.

Scroll down to latest machine update

Choose for PC or Mac

Click download update (I click save as and save it to my desktop). It is a zip file. Double click on zipped file. Double click unzipped file to start the update (the file name are different for different machines). Extract all files.

Under User Account Control click "Yes". (You may not receive this prompt.)

Welcome window opens. Choose language. Click "Next".

Choose Update Method. Cable or Stick.

Click “next”

Follow instructions for what two keys to press while turning on your machine.

Click next.

Update Anyway. Yes.

Next.

Remove personal files. Yes.

Next.

Start Updating. Yes.

Next.

Machine will restart when finished.

Click done and remove cable.
