

Picture Play Class Supply List:

Don't bring your machine, I'll have one in class and we'll play with it.

Bring a USB stick with a picture on it that you want to use. I recommend one with high contrast, and if it is a person or a pet, it needs to be a close-up head shot for best results.

It needs to be in the .bmp, .jpg, or .png format. PDF files do not work. Just take a picture with your phone and it will work great.

I'll have step by step directions written for you, so you'll be able to recreate what you learn at home.

This technique is so much fun! You'll love it!

I'll have several samples of pictures that work well, so don't stress if you don't have a picture.
