Extend your work area when using rulers. The Extension Table gives you an extra 15" of space to hold rulers on either side of the arm, and adds extra support when you’re working with templates and rulers.

Your Extension Table will arrive with four legs and two clamps.

**Step 1:** Insert the four legs in the places provided, so the table looks like above.
Step 2: Slide Extension Table around the base of the machine.

Step 3: Ensure that the four legs are on the carriage for support.

If the legs are not on the carriage, you may need to move the machine on the carriage to ensure the legs are on the carriage.

Step 4: Position the clamps on both sides of the Extension Table’s rear leg as shown in photo on the right. Note: This will help to keep the table secured to the carriage.

Step 5: Tighten the thumb screw under the carriage for securing clamp to the carriage.
