

## Creativity in three new dimensions

With the CutWork tool, you can cut out forms cleanly and precisely. Your imagination knows no limits. To achieve the desired results, you will need a BERNINA machine capable of embroidery and the CutWork tool, which you will insert in place of the needle. Break the mold and combine your embroideries with CutWork. You will be amazed at the gorgeous effects you can achieve – whether on garments, accessories, or quilts.

*The BERNINA DesignWorks Software Suite and the companion accessory tools are compatible with the following BERNINA embroidery machine models:*

*B 580, B 750 QE, B 780 and B 830.*

*The following BERNINA embroidery machines are compatible with the CutWork accessory and software only:*

*artista 200/630/640/730, aurora 430/435/440/450, bernette 340 Deco or higher.*

## Cut multiple layers

With the CutWork software and the CutWork tool, up to 15 layers can be cleanly cut out at once, depending on the material. You maintain precise edges quickly and evenly.

## Broderie anglaise, appliqués, or patchwork

Whether beautiful broderie anglaise or an awesome 3D look with appliqués – the combination of creative technologies produces amazing effects. And when you are working on patchwork, CutWork helps you create individual or multiple layers in the desired form with just one operation. The result: perfect quilts.

## Create your own motifs using the software

The CutWork software offers numerous tools that make the individual editing or even the creation of your own motifs on the PC possible. Operating the software is simple and clear. A sequence manager indicates the order of the motif areas to be cut. In just a few steps, your own cut design with amazing effects can be made out of your very own idea.

Are you a proud owner of a BERNINA 830 or a BERNINA 580? In order to use the DesignWorks Software Suite and Tools, you need to install the newest Firmware Update before doing so!
