

JANOME

MB-4

It does more... so you'll do more!

Janome MB-4.
Taking home embroidery where it's never been before.

It's not just a new machine – it's a whole new world of home embroidery!
Janome introduces the MB-4 -- the world's first four-needle embroidery machine made for home use!
We've taken everything you love about Janome Embroidery and quadrupled the capacity!
Don't let its professional profile intimidate you –
you'll find the innovation and ease of use you've come to expect from Janome.

Professional Quality in Every Stitch

Legendary Janome dependability and
stitch quality give you professional
results you can be proud of.

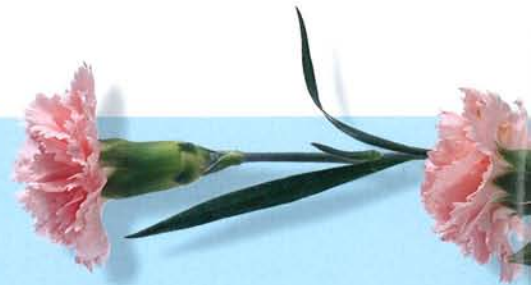

Create more with the MB-4

Just look at the projects
you can do easily
and quickly with the
Janome MB-4

Ever wished you could bring the proficiency of a professional embroidery machine home? Now you can. With four needles – four times the capacity of a household embroidery machine – and an eight-color thread stand, you can set up once and move on to other projects while your MB-4 gets it done.

Assign and change each of the four needle positions individually. The MB-4 automatically cuts jump threads – even between letters – saving you time and hassle.

Edit at a touch on the optional Remote Computer Screen.

The RCS gives you total set-up and editing control - with up to 65,536 colors. Custom edit stitch lengths from 0-0.5mm to eliminate short, dense stitches that can lead to thread breakage.

Easy Features
from Start to
Finish!

RCS: On-screen

editing control

Get Connected to a World of Design

Plug into a world of design resources - the MB-4 is built to work with most embroidery formats, when used with Digitizer MB software (sold separately). A built-in library of 5 thread brands lets you reference the thread choices by number or name for complete accuracy.

Access designs stored on the MB-4 with the onboard control.

Link directly to your PC with Digitizer MB software (sold separately).

Slide in a Compact Flash Card (requires adaptor) or Janome Design Card.

Pop in your USB Memory Key.

professional
machines!

The MB-4 weighs only 45 lbs. Fits a 15"x 21" space

Profitable

Use your talent to start your own business. The MB-4 was created to give you professional-quality results for a fraction of the cost of an industrial model.

Compact

Imagine the places you can take your embroidery business – to soccer games for personalized t-shirts, to trade shows or craft fairs for embroidered logos or extra flair – just about anywhere the quality and ease of the MB-4 can bring a personal touch to your projects.

Customize letters at a touch with the optional RCS and built-in font selections!

Monogram and create custom designs quickly and easily. Import logos from compatible stitch design programs to give teams and corporate clients a personal touch.

The three MB-4 hoops (included) snap in and out easily and provide the embroidery areas most often used in the industry.
