Brian Head Town
2022 Chipping Project

Brian Head Town in conjunction with the Utah Division of Forestry, Fire, and State Lands has for the past several years done chipping projects in the Town of Brian Head. We are planning to continue this project for the fall of 2022.

These projects are a huge benefit to our community in reducing fuel loading that has built up on our private properties for decades. Property owners can participate in this project but must follow the guidelines below when creating piles that will be chipped by our crews.

**Guidelines:**

- Start piling limbs ASAP.
- The Last Day for piling will be beginning to the middle of August (No exact date has been set).
- Property owners wanting to participate in the Chipping Project **MUST** contact fill out the google form link posted on the Brian Head Public Safety page, or the Town's Website.
- This project is open to any property owner in any subdivision that is located in the Town of Brian Head
- Materials to be chipped are only trees and branches, No brown pine needles, No rotting material, stumps, or construction material.
- The Maximum diameter of trees/branches is four inches (4”).
- The Maximum length of limbs should be four feet (4’).
- Avoid piling old rotten limbs and small branches and focus more on green material.
- Any wood that is good enough to be used for firewood should be piled near the chip piles for others to use.
- No piles are to be located on the roadway or in the barrow pit of any road, keep the piles on your property
- Place/stack material with the larger end facing toward the roadway (But still on your property)
- For any further information please contact Brian Head Town or Brian Head Public Safety at the phone numbers listed below.
