Others: Ron Harris

1. Welcome

A. Prayer: Nick Pollock

B. Pledge

- COVID-19 Updates:** Meeting was called to address the Wellness Center concerns. Taryn called David Church on regards to keeping it open. He reported that it's not a liability if the virus pops up in the facility. Garfield County has not made an order to close the gyms/weight rooms down. David Church did recommend closing it down if it is being used a lot. Shiloh reached out to Southwest Department Health but hasn't received a call back. The work out area has ability to sanitize machines and everyone seems to be using precaution. It hasn't been overcrowded. The usage has dropped significantly over the past few weeks. Need to educate that wipes need to be thrown out after a few swipes and the area needs to be wet at least for a minute. Do we want to go with Spic & Span that can sit on the areas for longer? Ron – reported that every sanitizer has different requirements. Need to read the fine print on how long it needs to set on each type of surface. Ron has been in contact with Nicholas and they have a product Sani Quad. It is a concentrate and it tells you the mix for each bottle. It is a little harsh so don't let it out open to the public. This can be mixed and sprayed through a weed sprayer. The CDC is keeping a list of sanitizer that is accepted. Need to wash hands!

Gym – We need to make sure balls are sanitized. There are currently wipes available in the gym too. Maybe set limits to shoot around and rules to not allow scrimmaging. Lately there has just been a few individuals or family households utilizing the gym. Do we close things down and do a super sanitize after hours or first thing in the morning? What about the treadmill tread? Does it need to be sanitized? Can it be sprayed with Spic & Span while its running?

Shiloh would like to hear back from Southwest Department of Health for further guidance. May need to hang up more signs to express the need to take things serious. Maybe add the sanitizer requirements. If individuals are not complying, we may have to kick them out for month. Do we require them to bring their own sweat rags? Council okay to keep the gym/weight room open until further notice. Taryn will make more signs. Limit to 10 people etc. Taking proactive steps will reduce any concerns. Maybe add an automatic hand sanitizing machine to the gym and weight rooms. Taryn will look into purchasing some. Taryn is currently sanitizing all bathrooms. Motion made by Nick to follow the guidelines presented today and keep the gym/wellness center open. Motion 2nd by Bryce, Cherrie Yes, Gary Yes

- Ordinance on Electronic Meetings:** Governor passed the electronic meeting act. It loosened some of the rules regarding open meetings. However, we will put an ordinance in place for future meetings that may need to held electronically.

It is proposed to adopt Ordinance # 2020-001 to put in place to allow public electronic meetings. Motion made by Gary to adopt, 2nd Bryce, Cherrie Yes, Nick Yes.

Hold off on major spending right now. Keep on top of cleaning supplies though. If there are any residence struggling let the Mayor know. Ruby's has extra food if residence need it. Let them know about the free lunches and breakfast through the school. Care and share is getting low and asking for donations but they are still open. Food bank will be in Tropic on April 14th at the Heritage Center. Make sure we all do our part and social distance and keep the COVID 19 from spreading. Commissioner David Tebbs has been a great resource during this time. Feel free to reach out to him as well with any issues or concerns.
