West Bountiful City
Job Announcement
City Engineer

Posted: May 27, 2020
1st Review of Applications: June 16

Position Salary Range: $76,000 - $106,000 plus comprehensive benefits

This position offers candidates a rare opportunity to join a tightknit team while working independently on a variety of highly technical projects. This is a job for someone who is ready to tackle any project and take pride in serving the needs of residents.

The City
West Bountiful is a hidden gem located in the southern portion of Davis County. At 3.3 square miles and a population approaching 6,000, what appears to be a quiet bedroom community actually has a thriving commercial district along I-15, a large oil refinery, and many of the same challenges that larger cities face. The city has specific funding streams to rehabilitate public infrastructure, and over the last ten years that city has designed and completed millions of dollars’ worth of water, street, and park improvements. The city has also been highly successful in working with UDOT and other partners in receiving grants for public projects.

The Position
This is a full-service engineering position that sees a project through from its placement on a capital plan, to securing funding, to preliminary and final design, to procurement and contracting, to project management and inspection, until final completion. The city engineer also serves as the Land Use Administrator and as Building Official, taking an active role in development activities, including reviewing plans, advising the planning commission and city council, working with developers to understand city design standards and land use code, and overseeing the contracted building permit process. A full job description is at www.wbcity.org.

Qualifications – Graduation from college with a bachelor’s degree in civil engineering and (8) years of progressively responsible experience directly related to duties listed in the job description, or an equivalent combination of education and experience. Must be a licensed Professional Engineer. See job description for full list of minimum qualifications.

Along with a standard application, interested individuals should submit a cover letter, a complete resume, and references to: West Bountiful City, Attn: Patrice Twitchell, 550 North 800 West, West Bountiful, UT 84087 or via email to jobs@wbcity.org. Applications will be accepted until the position is filled. The 1st review of applications will be June 16, 2020. Questions should be directed to Patrice Twitchell at (801) 292-4486.

West Bountiful City is an Equal Opportunity Employer.
