AUTO RESUME	<p>Yes – Resume is a feature that ensures that even if the power goes off in the middle of an embroidery design stitching, you will be able to get right back to the exact stitch and placement where it left off without missing a beat. ALL of our machines with the exception of the Verve have this feature. It's a great feature to show to someone who has an older model machine that does not have this capability. <i>Solaris 2 and Venture also offer Auto Resume for IQ Designer.</i></p>
