

## Mystery Quilt #1

### Clue #4

Welcome back to our Mystery Quilt. This week is basically a repeat of last week.

This week we are working with 2" x 2" squares in Color C and Color B (background).

Sew one 2" x 2" Color C square to a 2"x2" Color B (background) square using a ¼" seam allowance.

Make 72 of these sets. Chain stitching saves time and thread. Remember to stop midway through sewing these to give you a change to stretch.

\*Chain Stitch – when the first set is sewn, do not cut the threads. Line up the next set under your presser foot and sew. Repeat. When you are done you will have a long "banner" of sets.

Now clip those sets apart, and they need to be pressed to the dark side. these are tiny pieces so you do not need to iron them. Just pinch the seam between your thumb and index fingers to flatten the seam.

Now we are going to the four-patch. For those of you who are unfamiliar with the four-patch, using 2 sets, place them so Color C is at the top of one set and at the bottom of the second set.

Sew the two sets together, matching the opposing seams.

The Four-Patch Squares will measure  $3\frac{1}{2}'' \times 3\frac{1}{2}''$ .

When you have them sewn together, you will have 36 Four-Patch squares of Color C and Color B (background.) You should have 36 Four-Patch squares of Color A and Color B (background.)

You will also have 18 Half square triangles with Color A and Color B and 18 Half square triangles in Color C and Color B. (The Half Square Triangles should measure  $3\frac{1}{2}'' \times 3\frac{1}{2}''$ .)

That's 108 sections of the Mystery Quilt! Good job!

Only 2 more clues left! Got any idea what this quilt will look like?

See you next Tuesday when we will put together some of the clues.
