

The BERNINA 3 Series

Your new go-to machine

Being a sewist, a maker, a creator is serious business. When it's time to make, your creativity deserves the support of a great partner. Meet the B 335 and B 325 machines. Small enough to fit into any sewing nook, yet powerful enough to stitch through your toughest materials and ideas. Plus, they look as good as they sew. They are after all, BERNINA.

QUALITY FROM TOP TO BOBBIN

The BERNINA 3 Series allows you to enjoy your favourite hobby to the fullest. On the inside, modern technology and reliable quality ensure that nothing prevents you from being creative. On the outside, it's the simple, user-friendly handling that will convince you. Settings can be changed directly on the colour 4.3-inch touch screen. The direct selection buttons allow quick access to functions such as needle stop up/down, stitch width, pattern end or securing a seam. Stylish sewing with BERNINA, is that easy!

SIMPLE EDITING ON THE TOUCH SCREEN

The desired stitch is selected quickly and easily via the touch screen and the stitch width and stitch length are set automatically and can be conveniently adjusted using the buttons. You can combine stitches or customise decorative stitches using the pattern change function. You can create continuous patterns using pattern repeat. Individually adjusted stitches can easily be saved so that nothing gets lost. And what's more, all the settings are visible on the display. Simple. Stunning. Creative.

COMFORT BECOMES STANDARD

Frequently used functions such as start/stop for sewing without a foot control, securing at the beginning or end of a seam or reverse sewing are easily accessible just above the needle. Choose whether your machine stops with the needle up or down at the touch of a button. When the button is pressed, the needle moves half a stitch at a time – convenient, for example, when bringing the bobbin thread up after threading. The pattern end button is invaluable when sewing decorative stitches. The continuously variable speed control allows you to sew up to a rapid of 900 stitches per minute.

BERNINA FREE HAND SYSTEM (FHS)

Raise or lower the presser foot while simultaneously lowering the feed dog without having to take your hands off the fabric – that's the joy of the BERNINA Free Hand System (FHS). The knee lever makes it possible! Add FHS functionality to your B 335 with the optional knee lever – simply insert it and you're ready to go. The FHS is not available on the B 325.

GOOD THINGS COME IN SMALL PACKAGES

Large enough to stitch your favourite projects, but small enough for compact spaces, the BERNINA 3 Series offers 16 cm (6.3 inches) to the right of the needle. The freearm makes manipulating closed items, such as sleeves or trouser legs, particularly easy and convenient.

BRIGHT AND CONVENIENT

The semi-automatic threader makes threading the needle simple and the bright LED sewing light lets you sew through the night.
