

# Edge-to-Edge Quilting on Your Embroidery Machine

Instructor: Terri Miller

Are you looking for a way to quilt your projects that doesn't involve free motion quilting or a walking foot? Then this is the class for you. Using Amelie Scott's Designs' "Edge-to-Edge Quilting on Your Embroidery Machine" book and our embroidery machine, we'll learn how to determine what size design we want, plan where to start quilting, make our templates, and use the "Easy-Connect Quilting" technique to quilt.

For this class I have chosen the Plain Meander design (small size) for us to use. The quilt sandwich dimensions listed below were chosen so that the sandwich would be large enough to learn the "Easy Connect" technique and how to control the rest of the quilt sandwich. Please do not bring larger projects to class. Also, you do not have to have a pieced top. You can use a single piece of fabric for the top of your quilt sandwich.

## Supply List

- Embroidery machine in good working order (with power cord, Embroidery unit, embroidery foot, etc.)
- Embroidery hoop (minimum size 6" x 10")
- Amelie Scott's "Edge-to-Edge quilting on Your Embroidery Machine" book
- Files Plain-SA and Plain-SB files on USB or loaded in embroidery machine
- 75/11 Embroidery needles
- Thread to go with fabric with matching bobbin
- Quilt Sandwich – sandwich should be spray basted together using the following layers:
  - Top should measure 30" x 30"
  - Low-loft Batting should measure 40" x 40"
  - Backing should measure 40" x 40"
- Cut Away Stabilizer (not mesh)
- Basting Spray, pins, safety pins (for holding sandwich together)
- Fabric Marking tool
- Ruler that fits inside embroidery hoop
- Double sided  $\frac{1}{2}$ " basting tape ( ie: Clover 9505)
- Calculator (only need basic math functions)
- Scissors, thread snips, tweezers and other supplies you reach for when embroidering
- Hand sewing needle you can thread if you want to bury your thread tails
- Note taking materials
