PRODUCT INFORMATION SHEET

HORIZONTAL CHILLER SERIES

HORIZONTAL CHILLER SYSTEM (HC-120-G2)

HORIZONTAL CHILLER – FILLING STATION (HC-FS)

HC-120-G2

HC-FS

The **HC-120-G2** is virtually maintenance free and when connected to a city water supply provides an endless supply of chilled drinking water. From the custom-formed aluminum wagon to the anti-microbial treated Safety Spouts on the drinking nozzles, this system is ready for whatever comes its way. Featuring flat-free caster wheels, a 120-quart Igloo® Super Tough™ ice chest with 80+ feet of ice-covered copper tubing, Schedule 80 PVC manifolds, with aluminum sleeves, the HC-120-G2 is essential for sideline hydration.

- The Horizontal Chiller System features industry-leading durability and reliability.
- The Chiller's closed system virtually eliminates the possibility of introducing contaminants into the water supply
- Connects to city water supply via the available Sanitary Drinking Water Hose (SH-50) and uses the water system's pressure to push water through 80+ feet of ice-covered copper tubing inside the Igloo® Super Tough 120 ice chest.
- Waterboy Sports' patented Safety Spouts prevent the nozzle from coming into contact with the drinker's mouth, reducing contamination possibilities. ALL Safety Spouts are treated with an anti-microbial for additional protection.
- The Gen2 wagon is designed to fit through standard doorways and the flat-free caster wheels allow for easier movement.
- Like all Waterboy Sports Pressure-fed Hydration Systems, this model requires no cups, thereby eliminating clean up time and saving landfill space.

The **HC-FS** is based on the HC-120-G2, but with a twist by adding our patented Filling Station package. The Filling Station allows up to 4 drinking bottles, outfitted with our patented Quick-Fill, Through-the-Lid™ filling technology without interfering with the drinking nozzles. Able to fill bottles in as little as 8 seconds, the Filling Station provides a safe, sanitary way to refill drinking bottles for on-field hydration. This package also includes 24 drinking bottles with 4 carriers, a work shelf to hold the bottles, a 50' Sanitary Drinking Hose (SH-50) and an Inline Steramine Strainer (ILSS) to assist with sanitizing the chiller, tubing and manifolds.
