HORIZONTAL POWER SYSTEM SERIES
HORIZONTAL POWER MODEL (HPM-T-G2)
HORIZONTAL POWER MODEL - FILLING STATION (HPM-FS)
ULTIMATE POWER MODEL (U-HPM)

HPM-T-G2

HPM-FS

U-HPM

The **HPM-T-G2** is the industry-leader in mobile hydration. From the custom-formed aluminum wagon to the anti-microbial treated Safety Spouts on the drinking nozzles, this system is ready for whatever comes its way. Featuring flat-free caster wheels, a 55-gallon water tank with an All-drain belly sump, a Heavy-duty Tow Arm, Schedule 80 PVC manifolds, with aluminum sleeves and the removable Power Pac with EPA-approved drinking water pump and rechargeable battery, the HPM-T-G2 is essential for sideline hydration.

- The Horizontal Power System features complete mobility and industry-leading durability and reliability.
- Waterboy Sports' patented Safety Spouts prevent the nozzle from coming into contact with the drinker's mouth, reducing contamination possibilities. ALL Safety Spouts are treated with an anti-microbial for additional protection.
- The Gen2 wagon is designed to fit through standard doorways and the flat-free caster wheels allow for easier movement, even when full.
- The water tank's 10" top opening makes filling and cleaning easy, while the belly-mounted drain sump allows for more complete emptying for cleaning and storage.
- Like all Waterboy Sports Pressure-fed Hydration Systems, this model requires no cups, thereby eliminating clean up time and saving landfill space.

The **HPM-FS** takes the HPM-T-G2 to the next level by adding our patented Filling Station package. The Filling Station allows up to 4 drinking bottles, outfitted with our patented Quick-Fill, Through-the-Lid™ filling technology without interfering with the drinking nozzles. Able to fill bottles in as little as 8 seconds, the Filling Station provides a safe, sanitary way to refill drinking bottles for on-field hydration. This package also includes 24 drinking bottles with 4 carriers, a work shelf to hold the bottles and an ice chute to aid with filling the tank.

The **U-HPM** is the crème de la crème of the Horizontal Power Series and comes with a customized* insulating Tank Coozie (TC-55) with YOUR team's logo proudly displayed on both sides. There is also space for a sponsor's logo on each side, so you can generate revenue for your program by selling that space.

* Customization requires additional time for sewing, so the TC-55 is shipped separately to allow you to begin using your system as quickly as possible.
