

## FINAL ASSEMBLY INSTRUCTIONS FOR THE GENERATION2 VERTICAL POWER MODEL

Thank you for choosing a Gen2 Vertical Power Model by Waterboy Sports for your Hydration Program, we are confident that you will NEVER regret your choice. As this IS a machine, proper use, care and routine maintenance will ensure that you get many years of use. Don't hesitate to contact us with any questions or guidance you may need.

Your new Vertical Power Model is shipped mostly assembled, with only the wheels and the handle remaining to be installed. Shipping this system fully assembled would have resulted in at least an additional \$100 in shipping costs due to the carton being classified as 'over-sized'.

The wheels slip onto the axle, off-set spacer to the inside, and are held in place by the provided cotter pins.

The handle is slipped in place between the top of the back and has 4 bolts.

We felt that saving \$100 is well worth 2 cotter pins and 4 bolts and hope you agree.
