

Machine Lift Adjustment Instructions

3-step soft-touch machine lift system means a gentle push moves your machine from storage to flat-bed to free-arm positions.

Raising Platform

1. Push down on the platform until you hear a click sound.
2. Gently let the platform rise back up by itself to the next stage. (I.e. flat-bed / free-arm)

Lowering Platform

1. Push down on the platform until you hear a click.
2. Gently let the platform rise back up until you hear a second click.
3. Push down until you reach the next position where you will also hear a click.
4. Gently let go to leave the platform in this position.
