

## Secondary Water Meter Installation

### Project Benefits

- 1** A new D&W shutoff valve (replacing the old) will be installed within the D&W meter box.
- 2** Residents will receive a monthly water use report.
- 3** Meters will facilitate water conservation and allow the Davis and Weber Counties Canal Company to test the effectiveness of the conservation program.

### Project Activities

- 1** 24 - 48 hour door hanger notice will be given before work at each residence.
- 2** Secondary meters will be installed inside a protective meter box.
- 3** The contractor will restore the area to its original state.

The Davis and Weber Counties Canal Company has employed a project-dedicated public involvement team to answer any questions you may have. Residents with questions may contact Zoe Rogich at (801) 719-9726 or [zrogich@langdongroupinc.com](mailto:zrogich@langdongroupinc.com). You can also find more information at [www.davisweber.org](http://www.davisweber.org).

## Secondary Water Metering

Dear Resident,

We will be installing secondary meters in the near future on all existing connections. New state legislation requires meters on all new secondary water connections and we are beginning to upgrade the existing connections. A Bureau of Reclamation WaterSMART grant was received to help fund the installation of meters on existing connections. The installation of the new meters will allow residents to learn about their water use and better manage their secondary water.

The first set of meter installations will start in January and continue through April 2020 and the second set of meters will be installed Fall 2020 through April 2021. The work will consist of a contractor removing the existing green box which contains the emergency shutoff valve and replacing it with a new meter box. There will be some minimal excavation required. The contractor will restore the area to its original state. You will receive a door hanger providing a 24 - 48 hour notice as to when this work will take place at your property. It is anticipated this will not interrupt or impact your drinking water service, as the meter upgrade is to your secondary water connection only.

Best regards,

**Davis & Weber Counties Canal Company**
