

Rest and Refreshing Introduction

Quilt Notes:

- The quilt is designed using 18 pieced blocks.
- All of the blocks finish to 10".
- The quilt size is 63" x 82".

Tips for this Project:

- We recommend using a binder in which to store the project information so you'll have it at your fingertips throughout the project.
- It's handy to use sheet protectors for the project documents and pattern pages.

You will need these following documents:

Fabric Requirements

- This lists the quantities of all the fabric you will need for making the quilt.

Cut List

- At the very beginning of the project, you will be cutting the fabric from the Fabric Requirements list into segments that will be allocated to individual blocks. That way, the question of what fabrics are needed for which blocks will be answered ahead of time.
- You will also need a method for organizing all of the fabric. Using gallon zip-top bags (or your own choice of container), mark them as follows:
 - Block #1 - #18
 - 16 Patches

Fabric Key

- This is intended to provide a visual for all of the fabrics listed in the Fabric Requirement list.
- Fill each empty square with a swatch of the fabric you will be using for that color.

Unit Piecing Packet

- This document contains instructions for a number of "units" - which are made larger than necessary and then trimmed down to size.
- We use this method for piecing because it ensures greater accuracy and more consistent results in block size and appearance.
- The block patterns will direct you to the Unit Piecing Packet for instructions on making the individual units that make up that block.
