How dense would you like the quilting (circle one)?

Standard: This is the quilting density recommended by the batting manufacturer.

Ultra tight: I want lots and lots of quilting (quilt will be stiff).

Moderately tight: I want the quilting close, but I don't want the quilt to stand up in the corner by itself.

Somewhat standard: Not quite standard, but still within the batting manufacturers guidelines.

Loose: I want the quilt to stay together but want it snug and cozy with a nice drape to it.
