

# The Goddess Tool is available at: [www.NeedleinaHayesStack.biz](http://www.NeedleinaHayesStack.biz)

You can make the many quilts using this template. I suggest you trace this shape and all notations onto a piece of template plastic. Cut out the shape on the outer lines. You can then use it as you would the acrylic tool. Be very careful not to cut through the template plastic as this will alter the size of your shapes and decrease your accuracy.

## **IMPORTANT:**

Many copiers change the size of the document by 2% - 3%. Please make sure your template is the right size before attempting to cut your fabric.

From side to side this tool needs to measure 5" wide.  
From end to end this tool needs to measure 14 1/8".

**Watch a video  
on the website  
about how to use this tool!**
