

CABO PULMO ECO-ADVENTURE

October 5-12 or October 12-19, 2019

Join Denver Divers for a journey to Cabo Pulmo, Mexico for a very unique diving vacation. Located northeast of Cabo San Lucas, Mexico, Cabo Pulmo is an unknown destination with many secrets to unveil. As a world heritage site, Cabo Pulmo's reefs enjoy strict protection from over fishing, allowing for pristine diving conditions with huge schools of fish surrounding you on every dive. In addition, because this destination is "off the map", few people visit every year, allowing for deserted beaches and one-on-one attention everywhere you go in town and underwater.

The town of Cabo Pulmo is run strictly on solar power and they source water from their own local wells, creating a sustainable eco-friendly community in the heart of the Baja Peninsula. Denver Divers will be staying in eco-casitas near the ocean with an un-obstructed view of the ocean at the main casita. We will dive, hike, and enjoy the pristine beaches and rocky shoreline during our week-long stay in this gem on the Baja Peninsula.

Call 303-399-2877 or email alimiller@denverdivers.com to sign up today. Space is limited.

Price: \$2,685
