

Babylock Club

December 2021

A. Maintenance tip of the month

1. Tightening up your embroidery machine. What screws to tighten up and when you need to make them tighter. Hoop screws, needle bar clamp screw, and presser foot screw.
2. Multi-purpose screw driver and all it's uses

B. Sewing tip of the month

1. Playing with the guideline marker and laser
2. Guideline marker has two settings, sub-line and main line
 - a. Main line can be used to track needle position or used as an edge guide-can be adjusted both horizontally and vertically. Very powerful tool for larger projects. Goes out to 30mm each side of center needle position and 50mm vertically down the fabric
 - b. Subline can be used as a guideline marker-goes out to 30mm on both sides of center needle position
3. Gridlines and how to use them
 - a. You can adjust your grid to 30mm. Goes to well over a 1" grid
4. Sub-line and using your angles to pivot around corners
5. Decorative stitches and pattern combinations
6. Using your pattern shift key to create different pattern looks and combinations

C. Embroidery tip of the month

1. Using continuous border function-Kate's project

D. IQ Designer tip of the month

1. Creating straight line applique in IQ Designer-Christine's Read pillow done in IQ.
