

Food Mixer with fabric border and rick rack trim

- Cut off bottom hem on towel
- Position embroidery 7" from bottom of towel (design is from Kimberbell's "We whisk you a merry Christmas" but you could use any embroidery design of your choice).
- Cut a fabric border piece that is 22" x 8". Press under about ½" on both short ends of fabric trim and fold wrong sides together lengthwise. Make sure that the edges of the fabric trim exactly match the width of the finished towel. Adjust if necessary.
- Stitch border fabric to wrong side of towel. Press border fabric to right side of towel and draw a horizontal line across where the top of the fabric border will be placed.
- Glue rick rack in place so the center of the rick rack is directly on the placement line. Stitch in place.
- Position border fabric in place and stitch along each short edge and long the top of the trim. You will be covering up half of your rick rack trim.

Enjoy!
