## OUTER BASKET

Fuse fusible fleece to wrong side of **outer basket** fabric. *Because fusible fleece can be sensitive to heat, we recommend ironing from the fabric side or using a pressing cloth.* From this, cut (2) 18" x 18" squares. Quilt if desired.

Cut  $4\frac{1}{2}$ " squares from bottom corners. (**IMPORTANT:** *If you are using directional fabric, note orientation is right side up before cutting.*)

Align squares, right sides together, and sew along sides and bottom with  $\frac{1}{2}$ " seam allowance, leaving notched corners open. Press seams open.
