

# How to Transfer a Design From a CD to a USB Stick

**Designer Plus V8 Software** - A powerful embroidery design creating and editing program that is available for purchase from your dealer.

**Artlink8** – A program that allows you to transfer designs from CD's to USB Sticks. Also to change design formats. Available free at [www.berninausa.com](http://www.berninausa.com)

**Bernina USB stick** – Bernina does not offer any warranty or support on non-Bernina USB sticks.

**Format** – The type of design your sewing machine reads. It is the last 3 letters of the file starting with (.)

**.art** – Bernina 730, 200

**.exp** – Bernina 830, 880, 640, 630, 440, 560, 570, 590, 700, 750, 770, 780, 790

1. Open Designer Plus V6 software design program **or** ArtLink6 design transfer program.
2. Insert cd into cd drive of computer
3. Insert a Bernina USB stick into USB slot of computer. Note which drive this is.
4. Click on FILE, then OPEN, then My Computer and then select the drive that your CD is in.
5. Find the design and then double click on it. Note: Try to select the design in the .art format.
6. Along the top row of icons is a picture of a sewing machine. Click the WRITE TO MACHINE button.
7. Select the USB option for your type of sewing machine, ie. 630, 730, 830
8. Choose the drive that your USB stick is plugged into from step 3 and click OK. (This step might not happen if you only have one USB stick in and the software recognizes it as a Bernina USB)
9. You'll see your design on the right and your USB stick on the left. Click the ARROW to transfer the design.
10. Place the USB stick into your sewing machine, select the design and embroider!
