

RAYON TIPS & TRICKS

- Needle Recommendations— Microtex/Sharps
- Pins—Sharp
- Press Carefully! If your iron is too hot the fabric will become “shiny.” Use a dry iron on medium heat.
- Pressing is recommended over ironing.
- Rotary cutters are more accurate. HINT: Put tissue paper underneath your fabric to prevent slippage.
- Stay stitch bias edges like arm and neck holes while working on garments. Rayons are very stretchy!!
- Prewash is recommended , tumble dry medium.
- Cut your fabric on a large surface. You don’t want your fabric to fall off the edges of a table. It’s very stretchy and will distort.
- Shorten your sewing machine stitch length.
