

decofoil™

A fun and creative way to add a foil finish to any project!

decofoil™ Fusible Spray Adhesive is a permanent adhesive intended to make foiling on fabric even easier. Simply pick your favorite stencil, spray on fabric, and iron your favorite color foil to create beautiful designs!

1. Place stencil or design on fabric and spray a medium coat of adhesive on fabric.

2. Peel off stencil and allow adhesive to dry for approximately 10 minutes.

3. Turn on iron, select a high setting with steam and allow to warm up. When ready, place foil, color side facing up, on top of the adhesive design and cover parchment paper. Place and hold iron on project for 10 seconds.

4. Remove parchment paper and allow foil and adhesive to cool. For best results, let adhesive cool for 1-2 hours. Peel foil away from adhesive design.
